## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 5 is rejected under 35 U.S.C. 102(b) as being anticipated by Powell US Patent 5,876,459.

Powell discloses a modular implant (see Fig. 7) comprising a neck (10) with a through bore, a link (36), a trochanter (52), an intramedullary rod (12) having a bore (44), and a fastener (18). The link, the trochanter and the rod each independently move relative to each other, the fastener is capable of being welded to the rod, the link is disposed in the bore of the rod and extends through the fastener and the trochanter is between the intramedullary rod and the neck.

### ***Allowable Subject Matter***

Claims 9 and 12 are allowed.

Claims 6-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

### ***Conclusion***

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn. However, the Examiner believes that the Powell reference reads on claim 5.
